

SSHAC WS 3C – Day 2 Summary notes

TI team

- Gulf Coast
 - Terminology: use Mid-continent for regions 2,3,4 in documents (no “group”)
- Depth-effects modeling
 - Consider Rg effects: use Frankel’s simulations (1 and 5 km) to develop simple model; run hazard; evaluate model
- Hazard
 - Add final models to Wolfram plotting tool
 - Provide hazard results for code verification: separate RLME and distributed sources
